Art Across Time Combined Knowings and Knots presents a range of interdisciplinary perspectives on the methodology of research-creation and asks how those who make knowledge think about and value it. Not just a method but a site of ongoing experimentation around what counts as knowledge, research-creation is a meeting place of academia, artistic creation, and the wider public. The contributors argue that academic institutions and funders must recognize research-creation as innovative knowledge-making that leaps over the traditional splitting of theory from practice while considering how gender/feminist studies, Indigenous practices, and new materialism might inform and develop the conversation. Through this book, readers can transform the way they experience both art and education. Contributors: Carolina Cambre, Owen Chapman, Paul Couillard, T.L. Cowan, John Cussans, Randy Lee Cutler, Petra Hroch, Rachelle Viader Knowles, Natalie Loveless, Glen Lowry, Erin Manning, Sourayan Mookerjea, Natasha Myers, Simon Pope, Stephanie Springgay, Sarah E. Truman

The Research Mission of the University

Methods of Research on Teaching the English Language Arts Since the 19th century, when art history became an established academic discipline, works of art have been “read” in a variety of ways. These different ways of describing and interpreting art are the methodologies of artistic analysis, the divining rods of meaning. Regardless of a work’s perceived difficulty, an art object is, in theory, complex. Every work of art is an expression of its culture (time and place) and its maker (the artist) and is dependent on its media (what it’s made of). The methodologies discussed here—formal analysis, iconology and iconography, Marxism, feminism, biography and autobiography, psychoanalysis, and structuralism—reflect the multiplicity of meanings in an artistic image.

Contemporary Arts as Political Practice in Singapore This bestselling, accessible methods of art history text has been updated to include new sections on race, gender, orientalism, and colonialism.
Poussin's Paintings The bringing together of the arts and qualitative inquiry is changing the face of social science research. The increasing shift toward arts-based research has raised complex questions, such as how to evaluate its quality and even whether distinctions exist between what is art and what is research. In this defining work, Gary Knowles and Ardra Cole bring together the top scholars in qualitative methods to provide a comprehensive overview of where arts-based research has come, and where it is going. Through various categories of art and art-based research - namely epistemological, historical, methodological, thematic - will address all the significant issues of conceiving and conducting arts-based or arts-informed research in the social sciences and humanities, as well as the challenges of composing final representations of the research.

Artistic Mentoring as a Decolonizing Methodology Bridging environmental and Indigenous studies and drawing on critical geography, spatial theory, new materialist theory, and decolonizing theory, this dynamic volume examines the sometimes overlooked significance of place in social science research. There are often important divergences and even competing logics at work in these areas of research, some which may indeed be incommensurable. This volume explores how researchers around the globe are coming to terms - both theoretically and practically - with place in the context of settler colonialism, globalization, and environmental degradation. Tuck and McKenzie outline a trajectory of critical place inquiry that not only furthers empirical knowledge, but ethically imagines new possibilities for collaboration and action. Critical place inquiry can involve a range of research methodologies; this volume argues that what matters is how the chosen methodology engages conceptually with place in order to mobilize methods that enable data collection and analyses that address place explicitly and politically. Unlike other approaches that attempt to superficially tag on Indigenous concerns, decolonizing conceptualizations of land and place and Indigenous methods are central, not peripheral, to practices of critical place inquiry.

Performative Memoir

Creating Social Change Through Creativity Hysteria is alive and well in our present time and is apparently spreading contagiously: especially the second decade of the twenty-first century has displayed an ever-increasing interest in the term. A quick Google search opens the gates to sheer endless swaths of discussions on hysteria, covering almost every aspect of public discourses. The arts—as it is often in such cases—seem conspicuously involved in and engaged with this hysterical discourse. Surprisingly, while the strong academic interest in hysteria throughout the twentieth century and most prominently at the turn of the century is well known and much discussed, the study of how these discourses have continued well into twenty-first-century art practices, is largely pressing on a blind spot. It is the aim of this volume to illustrate how hysteria was already well established within the arts alongside and at times even separately from the much-covered medical studies, and reveal how those current artistic practices very much continue a century spanning cross-fertilization between hysteria and the arts.

Multimodality in Writing

Visual Methodologies This volume offers the readers a diversity of insight into how multimodality works in texts, and the effects different modes have on generating and understanding meaning.
Feminist Speculations and the Practice of Research-Creation This book examines research using anti-oppressive, arts-based methods to promote social change in oppressed and marginalized communities. The contributors discuss literary techniques, performance, visual art, and new media in relation to the co-construction of knowledge and positionality, reflexivity, data representation, community building and engagement, and pedagogy. The contributors to this volume hail from a wide array of disciplines, including sociology, social work, community psychology, anthropology, performing arts, education, medicine, and public health.

An Introduction to Grounded Methodology for Emerging Educational Researchers Gillian Rose introduces the general themes and recent debates on the meaning of culture and the function of the visual in this introduction to interpreting the visual.

Three Approaches to Qualitative Research through the ARTS How does peripherality challenge methodology and theory-making? This book examines how the peripheral can be incorporated into ethnographic research, and reflects on what it means to be on the periphery – ontologically and epistemologically. Starting from the premise that clarity and fixity as ideals of modernity prevent us from approaching that which cannot be easily captured and framed into scientific boundaries, the book argues for remaining on the boundary between the known and the unknown in order to surpass this ethnographic limit. Peripheral Methodologies shows that peripherality is not only to be seen as a marginal condition, but rather as a form of theory-making and practice that incorporates reflexivity and experimentation. Instead of domesticating the peripheral, the authors engage in (and insist on) practicing expertise in reverse, unlearning their tools in order to integrate the empirical and analytical otherwise.

Getting to the Bottom of Top Research Methodology in Arts, Science and Humanities examines various aspects of research methodologies required in the field of arts, science and humanities. The book is divided into three different parts where the first part is dedicated towards the research methodologies used in the field of arts, following with the methodologies used in the field of science and humanities as part II and Part III respectively. Provides the reader with the insights into the three different field and the methodologies required to know more about the three.

METHODOLOGIES OF ART Designed to be used as both a class text and a resource for researchers and practitioners, Arts Based Research provides a framework for those who seek to broaden the domain of qualitative inquiry in the social sciences by incorporating the arts as forms that represent human knowing.

The Methodologies of Art Since the nineteenth century, when art history became an established academic discipline, works of art have been 'read' in a variety of ways. These different ways of describing and interpreting art are the methodologies of artistic analysis, the divining rods of meaning. Regardless of a work's perceived difficulty, an art object is, in theory, complex. Every work of art is an expression of its culture (time and place) and its maker (the artist) and is dependent on its media (what it's made of). The methodologies discussed here (formal analysis, iconology and iconography, Marxism, feminism, biography and autobiography, psychoanalysis, structuralism, race and gender) reflect the multiplicity of meanings in an artistic image. The second edition includes nineteen new images, new sections on race, gender, orientalism, and colonialism, and a new epilogue that analyzes a single painting to illustrate the different methodological viewpoints.

Peripheral Methodologies This volume is dedicated to exploring and exposing the challenges, the possibilities, and the
processes of empirical work in embodiment. Grounded in qualitative inquiry in the humanities and social sciences, the chapters describe perspectives and contexts of embodied research, but focus on the methodologies, methods, and analytic frames taken up to grapple with this ever-more theorised aspect of qualitative inquiry. The authors drawn together in this volume share an investment in the ways in which the body inscribes and is inscribed within research that foregrounds the cultural, social, affective, and political discourses that are at the core of how bodies act and are acted upon.

Methodologies of Embodiment Comprehensively revised and updated the Second Edition of the bestselling Visual Methodologies provides a critical introduction to the study and interpretation of visual culture. The Second Edition contains: - a completely new chapter on how to use the book - each chapter follows the same structure, making comparisons between methods easier - three extra chapters, each discussing a method not covered in the First Edition

Hysterical Methodologies in the Arts This book of eight brief chapters on different aspects of the visual arts is designed to explore the nature of imagery and its relevance to many facets of our lives. Drawing on a wealth of examples from Western and non-Western art through the ages, it examines a wide range of themes, from the relationship between form and meaning, to the methodologies of art-historical analysis, to the controversies that have surrounded certain works of art both past and present.

The Profitable Art and Science of Vibratrading Feminist Speculations and the Practice of Research-Creation provides a unique introduction to research-creation as a methodology, and a series of exemplifications of research-creation projects in practice with a range of participants including secondary school students, artists, and academics. In conversation with leading scholars in the field, the book outlines research-creation as transdisciplinary praxis embedded in queer-feminist anti-racist politics. It provides a methodological overview of how the author approaches research-creation projects at the intersection of literary arts, textuality, artistic practice, and pedagogies of writing, drawing on concepts related to the feminist materialisms, including speculative thought, affect theories, queer theory, and process philosophy. Further, it troubles representationalism in qualitative research in the arts. The book demonstrates how research-creation operates through the making of or curating of art or cultural productions as an integral part of the research process. The exemplification chapters engage with the author’s research-creation events with diverse participants all focused on text-based artistic projects including narratives, inter-textual marginalia art, postcards, songs, and computer-generated scripts. The book is aimed at graduate students and early career researchers who mobilize the literary arts, theory, and research in transdisciplinary settings.

Design Thinking Methodology Book This timely collection examines the contemporary arts as political practice, offering critical insight into some of the more controversial talking points that have shaped Singapore’s identity as a nation. Focusing on the role played by contemporary arts in shaping Singapore’s political landscape as the country celebrated 50 years of independence in 2015, the authors consider how politics is often perceived as that which limits the flourishing of the arts. Contending that all art is political, and that all art form is a form of political practice, this collection examines ways in which the practice of art in Singapore redraws the boundaries that conventionally separate arts from politics. It critically examines the tenuous relationship between the arts and politics and offers a timely reevaluation of the relationship between the arts and politics. In doing so, it opens a dialogue between artistic practice and political practice that reinforces the mutuality of both, rather than their exclusivity, and redefines the concept of the political to
demonstrate that political involvement is not a simple matter of partisan politics, but has an inherently aesthetic dimension, and aesthetics an inherently political one.

The Methodologies of Art People demand authentic participation in decisions that affect their lives. ToP methods answer that call because they reflect how humans think, growing out of reflective inquiry into what works in real life and the study of phenomenology and existentialism. This book explores the foundational understandings of this body of knowledge and its practice. Getting to the Bottom of ToP works at two levels: as a guide to processes that elicit participation to bring insights to the surface and ensure participants collaborate to bring the resulting plans to fruition and as a theoretical basis drawn from the field of phenomenology—an answer to any of us who have pondered what principles or theory about personal and group change underlie those processes. —Peter J. Taylor, Critical and Creative Thinking Graduate Program, UMass Boston I have longed for decades for this book, a profound and helpful exploration of the phenomenology of practice of ToP. In this breakthrough work, the Nelsons expose the philosophical foundations of the ICA’s ToP methods in ways that scholars and facilitators alike will find useful. By tracing ToP’s ancestry to the existentialist’s insights of Kierkegaard and Sartre and the phenomenological methods of Husserl and Heidegger, this book not only provides conceptual clarity but releases a deep wellspring of motivation and skillfulness for practitioners of ToP. I will definitely use this book in teaching my NYU Wagner grad courses on innovative leadership. —Robertson Work, author of A Compassionate Civilization, NYU Wagner professor, and UN consultant

Zofia Kulik Artistic Research Methodology argues for artistic research as a context-aware and historical process that works inside-in, beginning and ending with acts committed within an artistic practice. An artistic researcher has three intertwined tasks. First, she needs to develop and perfect her own artistic skills, vision and conceptual thinking. This happens by developing a vocabulary for not only making but also writing and speaking about art. Second, an artistic researcher has to contribute to academia and the -invisible colleges- around the world by proposing an argument in the form of a thesis, a narrative; and in so doing helping to build a community of artistic research and the bodies of knowledge these communities rely on. Third, she must communicate with practicing artists and the larger public, performing what one could call -audience education-. There is no way of being an engaged and committed partner in a community without taking sides, without getting entangled in issues of power. Consequently, the methodology of artistic research has to be responsive both to the requirements of the practice and the traditions of science. Here the embedded nature of the knowledge produced through artistic research becomes evident. Artistic Research Methodology is essential reading for university courses in art, art education, media and social sciences."

Knowings and Knots Three Approaches to Qualitative Research through the ARtS: Narratives of Teaching for Social Justice and Community incorporates aesthetic education into social justice discourses and advances qualitative research strategies through the medium of three theoretical frameworks: phenomenology, critical ethnographic research, and poststructuralist theories.

Art across Time Volume One Research-based Theatre aims to present research in a way that is compelling and captivating, connecting with viewers on imaginative and intellectual levels at the same time. The editors bring together scholars and practitioners of research-based theatre to construct a theoretical analysis of the field and offer critical reflections on how the methodology can now be applied. It shares twelve examples of contemporary research-based theatre scripts and
commentaries from an international group of artists and researchers, selected with an eye toward representing different approaches that come from a variety of Disciplinary areas.

Artistic Research Methodology This book explains design thinking methodology that is applied by high-performing enterprises, start-ups and organizations in developing innovative products; technologies; services; business models; marketing ideas; processes; spaces; and solutions for diverse business, social, and everyday challenges. It includes easily applicable design thinking techniques, such as HMW questions, personas, mind mapping, empathy mapping, affinity diagram, value-proposition canvas, storyboard, cause-and-effect diagram, brainstorming, brain dumps, reverse brainstorming, benchmarking, journey map, and prototyping. A real-life case study is used to introduce design thinking methodology and techniques in a more practical way to a broad range of practitioners, including project managers and IT specialists, innovation teams, marketing professionals and brand managers, product managers, designers, consultants, strategic planning experts, C-level executives, and architects. The book explains how artful thinking perspectives can be applied to enhance design thinking skills, such as creativity, thinking out of the box, empathy, visual thinking, observation, asking the right questions, and pattern recognition. It also describes how to apply design thinking and lean and agile methodologies together.

The Methodologies of Art Introducing the reader to grounded methodology and its ethical approach, this book explores the theory behind the method as well as how to use it to develop and evaluate learning and education projects. Grounded methodology is designed to challenge traditional educational research methodologies, and in doing so questions the notion of the need for highly formal research in institutional settings. In this respect, it is also a simple way of planning an educational project that needs an evaluative element. Covering data collection techniques used in the course of education research such as observations, interviews, course development, participant diaries and online data collection, this book investigates the practical realities of researching in education contexts and the differences in educational, national and cultural backgrounds. It is ideal reading for students and academics looking to update and increase their knowledge on grounded methodology, especially students who are researchers in final-year undergraduate or post-graduate level programs, or instructors planning to teach grounded theory or grounded methodology to their own emerging research students.

Research-based Theatre: An Artistic Methodology The methodologies of aesthetic thought have always had a deep, historic foundation and serve as a staple of philosophy. Researchers have begun re-examining the structure and levels of aesthetics by tracing the history of this practice and studying European and Asian traditions. This systematic perspective is an emerging topic of exploration yet requires an appropriate level of research that further investigates the recent discoveries of systemic aesthetics in today's modern world. New Aesthetic Thought, Methodology, and Structure of Systemic Philosophy is an essential reference source that discusses the organic connection between philosophy, mathematics, and aesthetics, as well as its application to other fields of human sciences. This book analyzes the history of aesthetics and studies the contemporary laws and function of beauty and nature. Featuring research on topics such as fundamental principles, mathematical methods, and humanistic logic, this book is ideally designed for philosophers, physicians, scientific researchers, mathematicians, systems engineers, complexity professionals, anthropologists, art designers, academicians, and students seeking coverage on the structure of artistic beauty through a systematic approach.

Advances in Visual Methodology "To expand the possibilities of "doing arts thinking" from a non-Eurocentric view, Artistic Mentoring as a Decolonizing Methodology: A Collaborative Painting Ethnography with Maya Artists Pedro Rafael González
Chavajay and Paula Nicho Cúmez is grounded in Indigenous perspectives on arts practice, arts research, and art education. Mentored in painting for eighteen years by two Guatemalan Maya artists, Kryssi Staikidis, a North American painter and art education professor, uses both Indigenous and decolonizing methodologies, which involve respectful collaboration, and continuously reexamines her positions as student, artist, and ethnographer searching to redefine and transform the roles of the artist as mentor, historian/activist, ethnographer, and teacher. The primary purpose of the book is to illuminate the Maya artists as mentors, the collaborative and holistic processes underlying their painting, and the teaching and insights from their studios. These include Imagined Realism, a process excluding rendering from observation, and the fusion of pedagogy and curriculum into a holistic paradigm of decentralized teaching, negotiated curriculum, personal and cultural narrative as thematic content, and the surrounding visual culture and community as text. The Maya artist as cultural historian creates paintings as platforms of protest and vehicles of cultural transmission, for example, genocide witnessed in paintings as historical evidence. The mentored artist as ethnographer cedes the traditional ethnographic authority of the colonizing stance to the Indigenous expert as partner and mentor, and under this mentorship analyzes its possibilities as decolonizing arts-based qualitative inquiry. For the teacher, Maya world views broaden and integrate arts practice and arts research, inaugurating possibilities to transform arts education"--

Research Methods and Methodologies for Art Education Non-representational theory is one of the contemporary moment’s most influential theoretical perspectives within social and cultural theory. It is now widely considered to be the logical successor of postmodern theory, the logical development of post-structuralist thought, and the most notable intellectual force behind the turn across the social and cultural sciences away from cognition, meaning, and textuality. And yet, it is often poorly understood. This is in part because of its complexity, but also because of its limited treatment in the few volumes chiefly dedicated to it. Theories must be useful to researchers keen on utilizing concepts and analytical frames for their personal interpretive purposes. How useful non-representational theory is, in this sense, is yet to be understood. This book outlines a variety of ways in which non-representational ideas can influence the research process, the very value of empirical research, the nature of data, the political value of data and evidence, the methods of research, the very notion of method, and the styles, genres, and media of research.

New Aesthetic Thought, Methodology, and Structure of Systemic Philosophy Zofia Kulik's rich artistic career has a dual nature. Between 1970 and 1987, she worked alongside Przemysław Kwiek as a member of the duo KwieKulik, after which she began to develop a successful individual career. While KwieKulik's work has been well established as central to the East European neo-avant-garde art lexicon of the 1970's and '80s, Kulik's solo work has yet to be examined in depth. The first publication devoted solely to her work, this monograph analyzes the themes of her rich and complex oeuvre, addressing the (post)communist condition, artistic labor, intermediality, and the conditions of working as a female artist. The book forms a portrait of Kulik as an artist whose work is both deeply focused and rich in variations that reflect the socio-political shifts in her native Poland. With contributions from leading art historians, including Edit András, Angela Dimitrakaki, Ewa Lajer-Burcharth, Suzana Milevska, and Tomasz Zatuski.

Place in Research By combining autoethnography, performance studies, and memoir, the authors create a writing genre called “performative memoir.” This book applies the current thinking in performance studies and autoethnography to demonstrate how performative memoir operates as a unique and specialized way of performative writing.
Fandom as Methodology

An illustrated exploration of fandom that combines academic essays with artist pages and experimental texts. Fandom as Methodology examines fandom as a set of practices for approaching and writing about art. The collection includes experimental texts, autobiography, fiction, and new academic perspectives on fandom in and as art. Key to the idea of “fandom as methodology” is a focus on the potential for fandom in art to create oppositional spaces, communities, and practices, particularly from queer perspectives, but also through transnational, feminist and artist-of-color fandoms. The book provides a range of examples of artists and writers working in this vein, as well as academic essays that explore the ways in which fandom can be theorized as a methodology for art practice and art history. Fandom as Methodology proposes that many artists and art writers already draw on affective strategies found in fandom. With the current focus in many areas of art history, art writing, and performance studies around affective engagement with artworks and imaginative potentials, fandom is a key methodology that has yet to be explored. Interwoven into the academic essays are lavishly designed artist pages in which artists offer an introduction to their use of fandom as methodology. Contributors Taylor J. Acosta, Catherine Grant, Dominic Johnson, Kate Random Love, Maud Lavin, Owen G. Parry, Alice Butler, SooJin Lee, Jenny Lin, Judy Batalion, Ika Willis. Artists featured in the artist pages Jeremy Deller, Ego Ahaiwe Sowinski, Anna Bunting-Branch, Maria Fusco, Cathy Lomax, Kamau Amu Patton, Holly Pester, Dawn Mellor, Michelle Williams Gamaker, The Women of Colour Index Reading Group, Liv Wynter, Zhiyuan Yang

Visual Methodologies

Art across Time combines sound scholarship and lively prose, engaging students with both its narrative and its lavish visual program. Popular with majors and non-majors alike, Art across Time offers readers more than a chronology of art; it discusses political, economic, social, and personal concerns that influence the artists and inform their work, uniquely conveying the ideas, beliefs, and circumstances that inspire creativity. Visual reproductions in the text are larger in scale and higher in quality than those in other art history texts, enhancing visual appeal and allowing students to view details and elements of composition with greater ease. The new third edition is enhanced by new visual connections between works, more use of color and architectural diagrams, an enhanced map program, new boxed readings, and more. In addition, the text's illustration program is now available to adopting instructors in digital format via The Image Vault—McGraw-Hill's new Web-based presentation manager. Instructors can incorporate images from The Image Vault in digital presentations that can be used in class offline, burned to CD-ROM, or embedded in course Web pages. See www.mhhe.com/theimagevault for more details!

Crafting Collaborative Research Methodologies

Enter the world of vibration trading with a new methodology for making more money, more safely. What if you could enter the markets and know, in advance, the exact value of trades needed to sustain a losing streak, by knowing their Martingale limits, to finally ensure a win? With Vibratrading you can. Applying the principles of "Boundedness" in conjunction with powerful stock/ETF diversification techniques, VibratradingTM allows you to accomplish what most traders and investors previously thought impossible, giving you an unfair advantage in any market situation. A new and revolutionary perspective on trading and investing, Vibratrading provides a powerful methodology for extracting profit. Non-directional, it is designed to appeal greatly to the vast number of directional traders consistently struggling to keep from losing their trading accounts. Providing a better, safer way to participate in the markets to make consistent profits, it is the only book you need to gain a crucial competitive edge. Presents a radical new trading strategy, VibratradingTM, that the market cannot move adversely against Demonstrates how a scale trader can enter the market at any level, without being restricted to entry at the "conventional lower end" of the instrument's historical range Teaches traders and investors the important techniques of securitizing and monetizing profits with emphasis on risk free vibrational
share accumulation Presenting a truly non-directional methodology, Vibratrading is the book you need to make more money, more safely.

Handbook of the Arts in Qualitative Research Crafting Collaborative Research Methodologies demonstrates a number of collaborative, visual and narrative methods that explore the promises and the ethical, relational complexities inherent in collaborative research. It engages with both the potentials and complexities of doing collaborative analysis and offers a medley of methods for analysis. These methods revolve around co-produced texts from Peru, Denmark and Bolivia, and involve images, memory work and practical approaches to intersectionality thinking. Through detailed explorations of the complex interweaving of issues of meaning-making, difference and the co-production of knowledges, dynamics of social exclusion and segregation become visible in the nexus between evocation and interpretation. Christina Hee Pedersen takes up the poststructuralist challenge of including researcher subjectivity as part of the analysis and, through a lively writing style, the reader is invited to engage in this analysis of the performativity of selves. This book can inspire analytical thinking for researchers and advanced students interested in expanding the rich dialogues among feminists doing poststructuralist and interdisciplinary inquiry, and for all students of qualitative and collaborative methodologies.

Looking at Art A stunning collection of cutting-edge essays which brings together the leading scholars in visual research. Clearly structured, and written in an engaging and accessible style throughout, this invigorating work will be the ‘must have’ text for teachers and students of ‘the visual’ across the arts, humanities and social sciences. - Elaine Campbell, Reader in Criminology, Newcastle University This is a book about research that takes the challenge of the internet seriously, that rises above disciplinary difference and points to new directions for social research. - Rob Walker, Emeritus Professor, University of East Anglia This innovative book examines and introduces cutting edge visual methods in social research. It explores the development of visual methodology as a field of interdisciplinary and post-disciplinary practice spanning scholarly and applied concerns. Positioned at the innovative edge of theory and practice in contemporary visual research, Pink’s engaging book goes beyond the methods, ideas and fields of practice outlined in existing texts and handbooks. This book examines: -How new theoretical and methodological engagements are developing and emerging in research practice; -the impact new approaches are having on the types of knowledge visual research produces and critiques; -the ways visual research intersects with new media; -and the implications for social and cultural research, scholarship and intervention. This book will be essential reading for any student or researcher thinking of using visual methods in their own research. Sarah Pink is Professor of Social Sciences at Loughborough University.

Non-Representational Methodologies Creative Arts Research: Narratives of Methodologies and Practices is an innovative set of essays that grows out of active engagement with arts practice, pedagogy and research. The collection presents a selection of arts-based research projects, their methodological, practices and guiding philosophies, and throws new light on a range of issues that bring artists, designers, and performers into conversation with one another. The collection weaves together theoretical and applied dimensions of creative arts research. Following Martin Heidegger, the lead authors, Elizabeth Grierson and Laura Brearley situate the text through consideration of ways of framing, knowing and being, looking and listening, analysing, being-with, proposing, acting and reflecting, constructing, performing, deconstructing, and learning. Heidegger’s notion of gathering and his proposition, Questioning builds a way the way is one of thinking provides the means to link the different chapters. This wide-ranging metaphoric device allows the authors to emphasise a set of fundamental questions concerning epistemologies, ways of knowing, and ontologies, ways of being, and the relations between the two.
Their book opens a conceptual space to recognise the diversity of practices that count as creative arts research. This collection is authentic, it speaks to the reader, it raises many questions and it theorises methodologies and practices of creative arts research in ways that the art student, the teacher, the practitioner, and the lecturer will find philosophical, interesting and methodologically insightful. The collection is to be welcomed as breaking new ground and it will have a deserved readership beyond the confines of the academic art-based community. Michael A. Peters"

Arts Based Research Art across Time combines sound scholarship, lavish visuals, and a lively narrative to provide students with a comprehensive, accessible, and engaging introduction to Art History. Popular with majors and non-majors alike, the text offers readers more than a chronology of art by placing each work within the time-and-place context within which it was created. Encountering and interpreting a work of art in context offers the reader the richest possible experience of it. Large scale and high quality visual reproductions of artworks are often presented from multiple perspectives to enhance visual appeal and allow students to view details and elements of composition with greater ease. A thoughtful pedagogical approach helps students consider what they are viewing.

Research Methodology in Arts, Science and Humanities This text makes available in a concise format the chapters comprising the research methodology section of the Handbook of Research on Teaching the English Language Arts, Second Edition. An introduction, designed to give K-12 teachers an understanding of the basic categories and functions of research in teaching, is followed by chapters addressing teacher professionalism and the rise of “multiple literacies”; empirical research; longitudinal studies; case studies; ethnography; teacher research; teacher inquiry into literacy, social justice, and power; synthesis research; fictive representation; and contemporary methodological issues and future direction in research on the teaching of English. Methods of Research on Teaching the English Language Arts is well-suited for use in upper-level undergraduate and graduate-level literacy research methods courses.
